

Request to get your orthodontics done faster the PROPEL way.

Q What type of treatment does it work for?

A Spacing, Crowding, Malaligned Teeth

Q Does PROPEL really work?

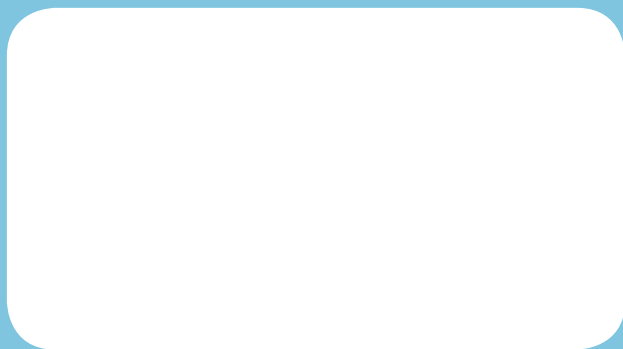

A Yes. In orthodontic practices throughout the USA, PROPEL has been successful in significantly shortening treatment time. Backed by major university research and clinical data, PROPEL is effective with any type of orthodontic procedure.

Q How does PROPEL work?

A PROPEL uses your body's own natural physiologic system to stimulate bone to respond faster when orthodontic force is applied to teeth. The result is significantly reduced treatment time.

Q What results can I expect?

A While every patient and treatment plan is different, treatment time can typically be reduced by 50% or more.

SMILES MADE FASTER

"Wishes can come true, my smile was perfect and in time for my wedding day"

LAUREN, 28 NEW YORK CITY

ORTHODONTICS

Accelerated Orthodontics
Using the PROPEL® System

Experience Reduced Treatment Time with PROPEL®

ABOUT PROPEL

The PROPEL System is a novel treatment that is scientifically proven to stimulate bone to remodel faster, accelerating the movement of teeth by 50% or more when done in conjunction with any orthodontic treatment.

ADVANTAGES OF PROPEL

- ✓ Decrease treatment time 50% or more
- ✓ No recovery time
- ✓ Treatment only takes 3 minutes

REAL PATIENT RESULTS

BEFORE

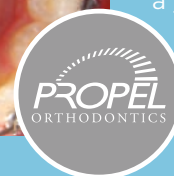

PROPEL will be performed on a patient who had a tooth extracted

4 MONTHS

A tooth extraction space can take up to a year to close, with PROPEL the space was closed in 4 months!

Get the smile you always wanted in half the time with PROPEL
